

Google Drive contamination incident

Ayana Fujishiro

The 2025 annual event schedule for Sendai City Yagyu Junior High School (my son's school before he transferred) has been mixed in.

This is a document about support for students and parents who have concerns or worries about attending school at Yagyu Junior High School.

"When a parent discovers their child's school mental health records, counseling guidelines, and unredacted student health data in their personal Google Drive—shared automatically by the school system without any notification or consent—this is not a data leak. This is the system functioning exactly as designed. The 'design' is institutional opacity masquerading as cloud efficiency."
